

Sikkerhet og personvern

About this site

The Infotjenester Group consists of the companies [Infotjenester AS](#), [Capitech AS](#), [Tholin & Larsson AB](#) and [Netcompetence AB](#), hereafter named as **Simploer**. Simploer has security as a basic criterion in all our work. To protect the customer's data in the best possible way, we have divided the security work into four main categories.

Agreements

Simploer has a set of standard agreements that are part of a signed contract. The agreements regulate Simploer's and the customer's duties and obligations and obligations against Norwegian and Swedish legislation. For products in the Simploer suite and the HSE Deviation product, a separate [Data Processing Agreement](#) (DPA) is prepared for the customer.

Privacy (GDPR)

We work continuously with privacy, ensuring that our solutions do not violate national legislation and GDPR. We follow the principals set out by the Data Inspectorate, so that data will never be available to anyone but the rightful owners and users. We enable our customers to fulfill their GDPR requirements. Read more [here](#) .

Information Security

We work with information security to establish methods of confidentiality, data integrity and access control for all customer data. Read more [here](#).

Data security

We work with data security involving various forms of physical protection of data, systems and infrastructure. Read more [here](#).
